🖥️ OBJECTIVE

I am a highly motivated and enthusiastic MERN Stack Developer, driven by a passion for delivering innovative and impactful solutions. With expertise in MongoDB, Express JS, React, and Node Js, I excel in building full-stack web applications and creating seamless user experiences. My proficiency in React Native enables me to develop cross-platform mobile apps, while my strong background in database management, particularly MySQL, allows me to design robust and scalable systems. I am eager to explore the possibilities of Next Js for server-rendered React applications, and I continuously stay updated with the latest technologies, seeking growth opportunities. Committed to delivering high-quality solutions, my ultimate goal is to make a positive impact in the tech industry through innovative and efficient development practices.

⚙️ SKILLS

React Js
Node Js
Express Js
react-native
Micro Services
Next Js
MySQL
Python
Mongodb

🗣️ LANGUAGE

English
Hindi

📁 EXPERIENCE

Superior Codelabs

Full Stack Developer

I develop innovative and impactful MERN Stack applications. With expertise in MySQL, Express JS, React and Node Js, I build seamless full-stack web applications and cross-platform mobile apps using React Native.

📁 PROJECTS

CRM Web App

It is a comprehensive web application designed to efficiently handle and organize leads. As the front-end and back-end developer, I was responsible for designing the application structure and managing the database. Leveraging technologies such as React, Node.js, Express and MySQL the app enables dynamic management of leads including location, stages, form data, roles, users, holidays (user-wise and country-wise), departments, organizational chart, target cycle, office locations, calendar, lead life cycle, bulk lead assignment, pending approval requests for stages, user and lead directory locking mechanisms and diverse reporting capabilities.

Next Js + Mobile App

It is a mobile website developed using Next Js and Firebase. As the front-end developer, I single-handedly created the entire project from scratch. To enhance user experience and accessibility, the web app was converted into a mobile app using React Native. With Next.js for the web app and Firebase for the backend, the project was delivered within two weeks.

Product web app

It is a dynamic website developed with React frontend and Node.js/Express.js backend. As a full-stack developer, I designed the UI, integrated APIs, and ensured seamless data flow. Technologies used: React, Node.js, Express.js, and MySQL
